# DIALOGS

Nick Grace C.; 2116 Florida Ave, NW; Washington, DC 20008  
E-mail: gringo@gwis2.circ.gwu.edu

I have enjoyed editing Dialogs over the past year, however, I must step down to take care of personal responsibilities. Many thanks for all of the logs, cards, & letters with kind comments & support. I have truly appreciated meeting everyone, either directly or indirectly, & look forward to serving the club again in the future. Pay attention next month for the name & address of the new Dialogs editor because I will not be in Washington after May 20.

## NEWS / SHORTLY NOTED

Associazione Italiana Radioascolto (AIR) announces a new award, the **"Confirmed Pirate Stations Award,"** available for DXers in four different classes: Class 1 - QSLs from 10 different pirates, Class 2 - QSLs from 30 different pirates, Class 3 - QSLs from 50 different pirates, and Class 4 - QSLs from 100 different pirates. DXers must send: 1) a list detailing each station with frequency, UTC time, & date noted, 2) six IRCs to cover the cost of postage, and 3) a handwritten & signed declaration certifying the authenticity of the data submitted. Applications should be sent to: AIR; Bruno Pecolatto; via Soana 13; I-10085 Pont Canavese (TO); Italy. (Direct)

## Propagation

Date	Flux	A	K	Date	Flux	A	K	Date	Flux	A	K
Mar 23	72	07	2	Mar 24	71	12	4	Mar 30	70	06	1
Mar 31	70	04	4	Apr 01	68	10	0	Apr 02	71	02	2
Apr 06	69	04	0	Apr 07	68	01	0	Apr 13	69	07	3
Apr 14	69	21	3	Apr 15	68	16	3				

Conditions were good for the most part, except for mid-April when geomagnetic activity increased. We are currently at the low point of the solar cycle & will be so until this Fall when hopefully the solar flux will begin to increase. However, the Space Environment Center doesn't forecast the flux climbing above 75 until mid 1997 (DX Bulletin 834). Other forecasters predict that sunspot numbers will reach Fall 1995 levels by February 1997, but what's certain is that within two years, we will see improvements on the bands. According to ARRL propagation expert, Tad Cook KT7H, the average fluxes are projected to be: 100 by Spring 1998, 158 by April 1999, & peaking at 199 in August 2000 (ARLP014 de KT7H). In the meantime, take advantage of the prime conditions on the lower bands next Fall & Winter, especially with the AM broadcast band extension opening up... 1620 kHz may not be available for very long! Check the A & K indices on WWW at :18 past each hour (updated daily at 2118 UTC) to make sure geomagnetivity is low. 73's and best DX from Washington!

**Deadline for the June Dialogs: May 15, 1996.**

John T. Arthur, proprietor  
RD #1, Box 15A Belfast, NY 14711  
(716) 365-8870 not collect

with help from the VR Troopers and other Friends. VR is electronically transmitted to Hdq on or before the 23rd of each month; please send your input and comments to the above address or leave them in the [V]eried Response section of the ACE/ANARC BBS prior to the 15th. Your active participation in the form of input, reports, suggestions, and/or constructive criticism is solicited and welcome. The ACE/ANARC BBS is available 24 hpd at (913) 345-1978, 300 to 14.4k baud, at least until the end of June.

Unless otherwise attributed, opinions in Veried Response are those of this mildly disturbed individual and should not be misinterpreted to represent The ACE as an organization, or any other sane person for that matter. Got a beef? Comments and complaints should be directed to this columnist in triplicate for round-filing, and not to any other address.

This month the column is dedicated in the memory of Erma Bombeck, who died 22 April from complications of kidney failure. Erma's writing style and her passion for life were an inspiration to all.

"Fear is the foundation of most governments."  
—John Adams

### What's News: the media report

There is a proposal at the FCC to provide beepers/pagers to homeless, allegedly under the provisions of the new telecommunications law, enacted recently. This was apparently a misinterpretation of the phrase "universal service". (This phrase is a misguided attempt to force everyone to pay even more for telephone service, whether they want it or not.) Sources within the FCC claim that the proposal was circulated in draft form but was never discussed with FCC Chairman Reed Hundt. [Reuters News Svc, Mar 96, thx Bill O. Rights]

FCC continues to grow... President Clinton's proposed 1997 budget calls for \$222.5 million to fund the FCC including 110 more employees, bring staffing levels to 2,255 - the highest level ever. Feeling is that the FCC will need the money and additional manpower to implement provisions of the new Telecommunications Act. [Radio World, 12Apr96]

Or gets downsized... Speakers at Senate hearings on FCC oversight indicate that as the new Telecommunications Act is implemented, the FCC staffing level should shrink by a large amount, including fewer Commissioners - maybe only one. Former FCC Chairman Dennis Patrick feels that most FCC functions could be "transferred to the marketplace" (more deregulation? jta), and former chief counsel Harry Shooshan feels that the FCC could "be headed by a single administrator". "By ... implementing the new law, the FCC should be putting itself out of business," said Shooshan. (Let's hope so - and none too soon, yes? jta) [ibid]

The new, revised, and hopefully final expanded band allotment plan has been unveiled, potentially allowing 87 stations to move "upstairs". The list has a California station on every frequency for some reason (didn't know California needed any more fulltime radio service! jta), while only two more stations in New Jersey, one in New York, and one in New Hampshire will get to move. 1630 will get TWO in Texas alone, but only two stations in all of North Dakota and one in Wyoming are listed to move! Better go back to the drawing board, FCC. [ibid]

If you're looking for in depth info on the EuroPirate scene, you need look no farther than Pirate Connection. PC is a slickly done 48-page bulletin with many of the big names writing columns. And you don't have to give up NAM news, either - Chris Lobdell does US Pirate Scene, MaryJo Ondrechen provides The Black Book, and our own Yolanda Lewis will be doing NAM station profiles! PC is published five times a year, and is a bit steep (US\$33 by air mail!), but it's a good overview of overseas activity, for sure. Samples are US\$5 or 5 IRCs from: Stefan Printz, Tegelgardsgatan 14, 211 33 Malmo, Sweden. [direct]

"Nothing is impossible to the man who doesn't have to do it himself."

### • The Swappe Shoppe • buy sell trade announcements Free to A\*C\*E members

Please be concise but complete: If you're looking for an item, accurately describe what you want; if you're offering something for sale, give make, model, honest condition, and asking price. And please help me keep these ads up to date. NO collect calls unless otherwise specified.

#### WANTED:

Broderbund "The Print Shop" program and graphics library for DOS on original 3.5" diskettes, to borrow or buy. Also looking for shareware HamComm 3.0 and/or JVFAX 7.0, and other DOS-based software on diskette. Whatcha got? Contact: jta at (716) 365-8870.

Schematic, parts list, and PCB artwork for 15 to 20 watt AM medium wave amp drivable by Ramsey or Panaxis rigs. Contact: Dick Hertz at Z Radio via Box 452.

Literature on transistor radios from the 1954-70 era, including sales brochures, manuals, catalogs, flyers, and magazine ads. Anything relating to transistor radios with or without pictures. Also interested in kits (eg: Eico, Heath, Knight, etc). Certain magazines of that era (Nat'l Geographic, Popular Electronics, etc) had lots of transistor ads. Don't need entire magazines, just the ads. Also looking for older pocket-sized transistor radios, store displays, pamphlets, and other promo items. Pls write to let me know what you have: Robert S. Ross, Box 1003 Stn B, London, ONT N6A 5K1, Canada. Or call (519) 685-1167.

Owner/Tech manual and info on any improvements for Realistic DX150 rcvr. Assembly manual and other info for Sonar 452 synthesized 2-meter xcvr, esp mic type & hook-up. Owners manual for Sansui RZ5000 computerized stereo AV rcvr. Contact: Bud Stacey, PO Box 907, Satsuma, AL 36572.

#### FOR SALE:

Various FT243 crystals, used in most older xmtrs: US\$10/ea. Contact: jta for complete list.

Realistic DX390 portable rcvr w/manual and AC & DC cords: \$180 (+ ship) OBO. Contact: Franz, N33015 Square Bluff Road, Whitehall, WI 54473.

Panaxis 10w FM amp kit, complete: \$125 unbuilt, \$175 built, tuned, and tested; FIRM. Contact: Fearless Fred via Box 452.

LPB S2(FM) mono compressor/limiter in good working condx; \$150, shipped. MFJ941E cross-needle 300-watt antenna tuner with book; \$75, shipped. Contact jta.

## strictly off the wall.... the rumor centre

The 'droperator of Box 28413 notified us that "Jury-Rigged Radio" is actually: JERRYRigged Radio; please correct your notes. He is QSLing with a totally unique sheet, and sez he has fixed his muffled mic...

Got a news flash in the mail recently. Sed VOID would be on the air on Sunday, 31 March, at certain times and frequencies. Unfortunately, the notice arrived in the mail on Monday, 01 April. As it happened, the station wasn't heard here, at least, so it didn't matter much...

For the record, VOID stands for the Voice of Idiot Drivel. Nice concept; hope to hear 'em one day...

What ever happened to the results of the ACE DX Competition, held over the Holiday Season? There has never been a list of entrants or winners, and no one has reported receiving a certificate to date...

Had a nice letter from Larry Thomsen thanking me for reviewing the KIWI QSL policy and asking me to do the same for other stations. The only problem, Larry, is that I'm not privy to that information as a rule. KIWI sent the info and specifically asked me to run it. Other stations have not done so, so I can't run it. MOST stations will QSL correct reports if they contain verifiable detail and adequate postage (although there are a few exceptions). Some stations will QSL any and all reports they see in ACE DiaLogs, PiPa, Monitoring Times, PopComm and Gentlemen's Quarterly, like Radio USA and WLIS. A few stations will verify only to people who have not heard them, like WJFK. Some require more than a complete report with verifiable detail; you apparently have to tell the Op how great he is to get a QSL, like Doomsday and Up Against the Wall. And then there's a few, like WJLR and WKIK, that won't verify anybody for anything. These are just general observations, of course. Ultimately, I can't spell out a station's policy unless they tell me what that policy is...

Mike Leclerc asks how much the 1996 Pirate Radio Directory costs. Well, I have to guess \$12.95 (+\$2 s&h) from Tiare, although Andy or George MAY have some for a bit less. Ya see, I managed to finagle a review copy (thx Gerry!)...

And once again, the ever popular Gripe List; the following stations promised QSLs but in more than one year have not come through with QSLs: Vox America (23 Apr 95), Vol Unknown MonkeySpanker (31 Dec 94), Vo Scotland (01 Oct 94), R Gumby Intl (QSO of 15 Feb 94), WJLR (01 Jan 94), The Great Southlands (01 Jan 94), WKIK (05 Sep 92), WHIP via CSIC (11 Apr 92), WCYC (05 Apr 92), and WNOT (21 Dec 91). Others heard that never verified are: Klingon R (27 Feb 92), WHIZ (04 Apr 92), WRFJ (08 May 92), KLAN-1620 (02 Nov 92), Baghdad Radio (24 Jan 93), Order of the Solar Temple (09 Oct 94), and AC Radio (CW tag to RBCN program, date uncertain). Also heard and reported WAOJ but somehow wasn't listed in ACE DiaLogs. QSLs for any of these may be sent to the address at the beginning of this column. Thanks much...

I hate to use valuable space to bring this up, but it has been brought to my attention that there have been some messages posted on the InterNet with my name on them; messages intended to "flame", deliberately offending and insulting other people. This cowardly juvenile action is by a sociopathic malcontent: the same person who now goes on the air to "badmouth the ACE" because he cannot think of anything positive to say or do; the same person who is so smart in his own mind that everybody else is a "security leak" or a "moron" (his words); the same person who cannot, or will not, discuss facts or issues and thus engages in illogical "ad hominum" attacks on those who question his unfounded opinions. Although he appears to feel safe hiding behind "anon.penet" servers for the most part, we have determined who the twirp - I mean "perp" - is, and he will be dealt with. For the record, I have never so much as logged onto the InterNet and probably will never do so since I don't have a local server and cannot afford to run up long distance bills; I have, in fact, never called any computer BBS other than the ANARC/ACE BBS. Additionally, the "posting host" at Auburn is not even a NY State campus; it's apparently in Alabama! Why would I run up bills to post such trash? Any messages attributed to me anywhere other than the ANARC/ACE BBS are

there without my knowledge or consent. These actions are certainly misrepresentation and fraud, and quite possibly a prosecutable violation of Federal law since the Inet crosses state lines. Get the message, "Cambio"...

"When we blindly adopt a religion, a political system, a literary dogma, we become automatons. We cease to grow."  
--Anais Nin

The ACE QSL Statistics appear in the Feb, May, Aug, and Nov editions of Veried Response. Please update your totals in January, April, September, and/or October for inclusion. You can mail them to: ACE Stats, PO Box 1, Belfast, NY 14711, or leave them in the [V]eried Response area of the ACE/ANARC BBS at 1-913 345-1978. And thank you for your continued support.

"Let the people think they govern  
and they will be governed."  
-William Penn

*here's a look at what was slipped*

## under the door the QSL report for: May 1996

FRANZ BERGMAN allows me to quasipseudoparaphrase him as adding to his collection two full data sheets (#9 & 38) from Northern Music Radio (via WREC) signed by DJ RD with an inflatable rubber-analog thing, a full data orange card (#170) from Radio Titanic signed by Tim Hawk in 40 days, a full data glossy white card (#306) from Radio Mirage (via NAPRS) with infosheet and letter in 41 days, a full data reception report signed by Nemesis with "verified" written on it for one of his many one-shot and special events stations, two full data cards (#296 & 297) from NAPRS for various relays, a full data "cannabis fiber" green card (#218) and pennant from KNBS signed by Phil Muzik, a full data checkered logo card (#53) from Caribbean Sound System signed by Count Whip in about two months, a full data "Friday or bust" paper card (#5) from Friday Radio in one month, a full data "they've fallen" sheet from WREC signed by PJ Sparx in about three weeks, and a full data sheet from WPN signed by Capt Squirtlong with infosheet in a few weeks.

JOE FILIPKOWSKI spent another wasted month sending reports and all he got was a full data "skull & crossbones" card (#294) with infosheet and letter from Star Club Radio (via NAPRS) signed by Roy Clark in three months, a full data "Virginia Beach" postcard from WAOJ in 3.5 months for ACE or PiPa log, a full data oversized pink card from All Azteca Relay Service signed by Jean GiPepsi in two weeks, a date & frequency only sheet from Country Frog Radio signed by Bullfrog in about five months, a full data sheet from Valentine Frog Radio signed by Bullfrog in 47 days for an ACE report, two full data cards (#18 & 42) from The Logical Alternative signed by Jeff Carmichael in five months for ACE logs, a full data "bikini babe" sheet (#547) from He Man Radio in about three months, three full data "semaphore alphabet" sheets (#1 - 3) from Jerry-Rigged Radio signed by Simon Bar Sinister in two weeks, and a date only "from Ozone Arkansas" sheet (#8) from Razorback Radio signed by Ferrill T. Hogg in about two months.

VINCENT HAVRILKO received three f/d 'Santa' cards # 30, 31, & 32 in 64 days from The Pirate Elf of Voice of Christmas, a f/d sheet from Cell Phone Radio along with newsletter signed by Sprint Contel in 18 days, and a full data sheet from Free Hope Experience in 70 days.

MIKE LECLERC became comfortably numb upon finding a full data "Pink Floyd" postcard (#6) from Mystery Radio signed by The Shadow, a full data "Cape Charles" postcard from WAOJ for a report in DiaLogs, a full data yellow sheet and newsletter from CELL phone Radio in 23 days, a full data blue logo card from WWWV signed by Billy Boner in 27 days, and four different sheets (#769, 774, 783 & 786) from WLIS signed by CP for various and sundry reports.

RAY PFAFF has four more: a "Calvin and Hobbes" QSL # 3 from Northern Music Radio in 5 weeks, 2 QSLs from Radio Azteca in 2 weeks, and 1 "Radio Free Speech All American Award" in 2 weeks.

JESSE ROSE went bungee jumping off his radio desk after receiving a full data "Ren & Stimpy Radio Daze" sheet (#384) from WREC signed by PJ in seven weeks, a full data "bikini babe" sheet (#540) from He Man Radio in 36-22-36 days, a full data "HIV+" card and sticker from WRV signed by Pete in 6.5 months, a full data "xmtr" card (#237) from RBCN signed by Bob in one week, a full data sheet from KOLD signed by Aldo in two months, and four full data sheets (#820-823) from WLIS signed by CP in seven weeks.

LARRY THOMSEN checks in with a full data "Scope Convention Center" postcard from WAOJ in about two months for an ACE log, two full data "HIV+" cards and sticker from WRV signed by Pete the Pirate in three to four months, a full data photo card with infosheet and letter from Radio Dr Tim in just under nine weeks, a full data "Ren & Stimpy Radio Daze" sheet (#374) from WREC signed by PJ in seven weeks, a full data orange card (#16) from KDED in four weeks, a full data sheet (#353) from He Man Radio in eleven weeks, four full data sheets (#837 - 840) from WLIS in about six weeks, a full data "Guy Lombardo" sheet (#24) from KOLD in about seven weeks, a full data card (#68) from Outlaw Radio in about 4.5 months, and a full data card (#247) with Mr Bill card and letter from RBCN in ten days.

GEORGE ZELLER recuperated from Winter Fest with a full data "pirana" card from Radio Pirana Intl signed by J R Garcia in about nine months (a replacement for the incomplete data card he sent last September), a full data "man driving car while talking on a cell phone" from CELL phone Radio signed by Sprint Contel in one month, a full data "All American QSL Award" sheet and listener survey from Radio Free Speech signed by Bill O. Rights in 19 days, a full data orange card (#10) from The Logical Alternative signed by Jeff Carmichael in 150 days for an ACE log, a date and frequency only studio photo card and RTL sticker from WSWL in less than one month, a full data multicolored "skull & crossbones" card (#289) from Star Club Radio (via NAPRS) signed by Ray Clark, two full data sheets from WLIS signed by Charles Poltz which got mangled by the post office in 35 days for logs in the ACE, a full data red "map of Arkansas" sheet (#4) from Razorback Radio signed by Ferrill T. Hogg in 69 days, and a full data "map of the world" card and personal letter from Radio One signed by Bobaloo in 19 days.

Ye Olde Columniste scored a full data "not a rocket scientist" sheet (#8) from RFM signed by HV Short in four short days, a full data "Amish takeover" sheet from Radio Free Speech signed by Bill

O. Rights also in four days, a full data "studio" card from WSWL in a couple weeks, a full data "map of the world" card from Radio One with record survey and personal letter in 12 days, and a full data "semaphore" sheet (#11) from Jerryrigged Radio signed by Simon Bar Sinister in 21 days.

## WHAT YOU MISSED

**Radio Bob • Box 17534 • Atlanta GA 30316**

Hi ACE readers. Everywhere it's spring and the new articles are just popping up out of the ground like weeds. Why, here's one now. In this new information article, I hope to be able to advise you pirate chasers about new time/day/freq trends which pirates may be using to attract attention and to spread their wings.

Ops: When you air a program and don't see any logs of your show, send the time/day/freq info to me at: R. Bob, Box 17534, Atlanta, GA 30316 and I'll list your work here. This will alert DX'ers to what you're up to. Here's an example below. This was an additional airing of my April Fools program which has gone unreported to my knowledge at this writing.

This article may not appear if I receive no logs in a particular month. 73's. Radio Bob.

### OP BROADCAST LOG:

RBCN 4/1 4001L \*01:00-01:48\* 20th Anniversary Mr Bill Show

### The Last Word

**Lewis & Gentry • ACEPUB@AOL.COM •**

This month we are happy to report yet another ACE contest winner! As you may recall, this is for our subscription drive contest, where all you had to do was to renew or join the ACE in the first part of 1996. One lucky winner was selected from all subscribers, and the winner is none other than Tony Straka of Pennsylvania. Please join us for a big round of applause for Tony, who will be looking mighty elegant sporting a tasteful, light-gray Radio Albatross T-shirt (courtesy of JTA and Radio Albatross staff). Congrats, Tony. How about sending us a picture of you wearing the shirt so we can share it with the rest of the ACE readership?

If you haven't won your shirt this time, don't despair, we have one more to give away. And we'll make it very simple this time: Just send us a short story or an article on any topic related to pirate radio hobby that is suitable for printing in the ACE. The story can be original or a reprint (provided a permission is received for copyrighted material). We'll review all the entries by let's say, mid-August and give away the T-shirt for the BEST contribution received. Winners will be announced in the September issue. Good luck! (P.S. If no one contributes, we keep the shirt!!!)

This month, we'd like to say big thanks to Ed Rausch, Gigi Lytle, Radio Free Speech (cool stickers!) and Radio Bob for their contributions to the ACE c/o ACEPUBS. We've received a request for some "listening primer" articles - is anyone out there interested in sharing some of the pirate radio listening tips with the newcomers to the hobby? If so, please contact us using the ACEPUB@AOL.COM address or the Elgin, IL snailmail address on the back cover of the ACE.

Speaking of contributions, we are always searching for some good quality copies of station QSLs for the coveted cover of the ACE. Surprisingly enough, there were less than a handful of station ops who were "brave" enough to ask for and receive the ACE cover. That's too bad... All you have to do to get your station noticed is to invest 10 cents in a photocopy and another 32 cents for postage costs, address the envelope c/o the infamous Elgin address and have it postmarked at any of the 99999 zip codes or upteenth zillion Canadian province codes for speedy delivery. You don't have to send us your return address! And if you're lucky, you too may become "cover material." So, until next time, 73's and have fun with your radio!

## CLANDESTINE PROFILE

**George Zeller; 3492 West 123rd St; Cleveland, OH 44111**

Your loggings, information, and speculations about clandestine radio stations are always very welcome for this column. You can send them direct to your editor at 3492 West 123rd Street, Cleveland, Ohio 44111. Or, you can call (216) 941-3366 anytime, or else (216) 696-9077 between 1200-2045 UTC weekdays. You can send information to me via [George.Zeller@acclink.com](mailto:George.Zeller@acclink.com) over the internet. About once a week I check into the ACE BBS at (913) 345-1978.

### ED KUSALIK VERIFIES OROMO

Lately we have mentioned in this column that QSL's from the Voice of Oromo Liberation have been arriving in DXers mailboxes. It now is clear that this station is one of the most reliable clandestines in the verification department. One of the happy recipients of a QSL from Oromo this month is veteran DXer Ed Kusalik of Alberta, whose full data letter arrived from them in 28 days. Ed used the address in Germany that has been working for everybody, which is written on Ed's QSL letterhead as Postfach 510610, 13366 Berlin, Germany. Taye Teferra, the Secretary of SBO Committee, Europe, was the verie signer.

Ed notes that his QSL shows an acronym of the station as "sbo," which stands for Sagalee Bilisummaa Oromoo. This is the identification to look for during the actual broadcasts. According to Ed's verie, the station's target area is East Africa and the Middle east on 5960 kHz for an hour at 1600 UTC on Mondays, Wednesdays, and Saturdays. Ed encloses a copy of his QSL, which we print here in *The ACE*. The verie, which is in English, contains three paragraphs that discuss the ideology of the station and the purpose of its broadcasts. Our congratulations go to Ed, and we appreciate the copy of the QSL that he sent in for us to see.

### RADIO ALPHA 99 AND DC RADIO

Mark Dawson of Virginia sends in two interesting items about two stations that straddle the border between clandestines, pirates, and bootleg broadcasters. First, Mark heard an interesting episode of jamming on March 2 that was directed at Radio Havana Cuba's regular 9850 kHz transmitter on 31 meters. A station identifying itself as Radio Alpha 99 sat on top of the Cuban broadcast from 0330-0350 UTC in upper sideband. Most of the jamming consisted of identifications: "Radio Alpha 99 Viva Cuba Libre." Mark says that the jamming signal was loud, and thus was effective at disrupting his reception of Cuba. This was somewhat outside the format of traditional anti-Castro clandestines that produce regular programming. Perhaps it was an attempt to create a "tit-for-tat" jamming situation to match the regular Cuban jamming of various anti-Castro clandestine and quasi-clandestine stations. It's not clear if this Alpha 99 incident was isolated, or if this jamming appears intermittently or even somewhat regularly. Has anybody else been hearing something like this? Sometimes we see clandestine activity in unanticipated places, so it pays to tune around the bands.

Mark also reports that he heard a Morse code broadcast of Radio DC on March 24 on 6955 kHz. The US Postal Service splotted Mark's postcard right at the spot where he listed the time for this broadcast, so it's hard to read. But, it looks like 0000 UTC was the time that Mark was trying to communicate for this log. As is typical of the activity from this station, its show was a repeated Morse code beacon with the content of, "RADIO DC, DON'T VOTE REPUBLICAN." With another national election coming up in November in the United States, it would not be a big surprise if this station increases its activity level on the pirate bands. Of course, the station is mainly a pirate, but its heavy political emphasis makes it lean near the borderline of clandestine status.

### ALAN MASYGA CHECKS IN

ACE member Alan Masyga of Minnesota checks in again this month with some miscellaneous information. First, although the source for the tip was not listed in Alan's letter, he points out that the FBI hatched a tactic

to try and draw out the "Freemen" in Montana via the use of a shortwave transmitter. The FBI attempted to sell a transmitter to the Freemen housed inside the compound where a standoff continues between law enforcement authorities and this extreme right wing group. Apparently this ruse did not work. I have seen occasional references in the press to the fact that several right wing groups are making use of bootleg shortwave transmitters for communications at times, probably using ham radio gear for the most part.

Although they hardly qualify as a clandestine, Alan has found an interesting World Wide Web site that will be of interest to many ACE members. The Church of the Subgenius, which is the group that has brought us the Voice of Bob, uses <http://sunsite.unl.edu/subgenius> as a URL to some reasonably detailed weird stuff. I also found considerable Subgenius material at <http://www.cs.hut.fi> overseas. If you're having trouble finding "Bob" on the internet, they are also linked from the WCSB radio page here in Cleveland, which can be linked from John Cruzan's excellent Free Radio page. Actually, those persons with sufficient "slack" will hardly need their computers to get all of this material.

Alan sends his appreciation to The Alan Masyga Project, the pirate that had been broadcasting Alan's QTH over the air. The station is now using Providence as a maildrop, according to Alan.

### REPUBLIC OF TEXAS

Larry Loper of Texas saw the item in *The ACE* about a proposal to construct a 50 Kw medium wave transmitter somewhere in Texas that would not be licensed by the FCC, but would instead be licensed under the auspices of the Republic of Texas. I have had no luck with the e-mail address that they gave in a Press Release about this scheme, since the e-mail address does not appear to be working. The Republic of Texas *does have* its own World Wide Web site, however, as we pointed out in this column.

Larry noticed that there has been some coverage of the Republic of Texas movement on the web site operated by the *Houston Chronicle* newspaper. According to articles on this site that had previously been printed in the newspaper, advocates for the Republic of Texas has held a march to the state capitol building in Austin to call attention to their movement. They asked the legislature for cooperation with their proposal for Texas to reinstate its republic status outside the USA government, but they had virtually no success. A *Chronicle* editorial column estimated the size of this group at 2,000 members. Their President, John C. VanKirk of San Antonio, was elected March 9 during a meeting in Lubbock. But, VanKirk is currently involved in a "rift" with the council members of this group. VanKirk called the Republic's council "crazy idiots" who have properties of "lunacy."

I don't think that we will be seeing a 50 Kw clandestine on medium wave from Texas anytime soon.

### LIBERTY LOBBY

I received an anonymous letter this month with considerable propaganda about the Liberty Lobby from somebody in North Carolina. Most of the material was ideological statements from this right wing political group. But, part of the information was a schedule of "Alternative Shortwave Radio Broadcasts" that are traditionalist, constitutionalist, nationalist, populist, sovereign, patriot, and Christian. The adjectives apparently meet the Liberty Lobby's political criteria. The schedule is listed in "EST TIME," which presumably would be four hours later UTC, now that Daylight Savings Time is in effect. In case you are interested in these programs, I'll list the entire schedule.

<u>PROGRAM</u>	<u>HOST</u>	<u>kHz</u>	<u>EST</u>
<u>Monday through Friday</u>

Scriptures for America	Pete Peters	3315	0000
We Hold These Truths	Paul Parsons	5065	0000

I need to add some brief remarks to all of this. First, this is obviously not a complete list of all quasi-clandestine programming from far right groups that is on shortwave. For instance, American Dissident Voices of the National Alliance is left out, as are others. Second, I don't intend to make a habit of this in *The*

ACE. The list is interesting, but I don't think that we need to turn this column into the "Listener's Notebook" for far right clandestine wannabees. Third, I noticed John Bryant on the list. I previously noticed that another man named John Bryant was running in the primary election for US Senate in Texas. Neither one of these John Bryants is the John Bryant of *Fine Tuning* and *Proceedings* fame in our hobby, as well as the Zenith radio book. Finally, I have not checked any of the schedule by monitoring it for accuracy.

### THANKS!

This month we thank several DXers for sending information direct to this column, including Ed Kusalik (Alberta), Alan Masyga (Minnesota), Mark Dawson (Virginia), Anonymous (North Carolina) and George Zeller (Ohio). Next month we all hope to hear from YOU by May 19 for the June "Clandestine Profile."

Dear sir,

Thank you for your interest to know Sagalee Bilisummaa Oromoo - The Voice of Oromo Liberation.

Sagalee Bilisummaa Oromoo currently broadcasts to East Africa and the Middle East on 5960 kHz in the 49 metre band from 16:00 to 17:00 hours GMT on Mondays, Wednesdays and Saturdays. SBO began transmission in 1984 which went on till June 1992, when it was forced to discontinue because of circumstances beyond its measure. It briefly resumed broadcasting at the beginning of 1995, but discontinued shortly due to poor reception in the target area. The current transmission began in June 1995 and is being well received by a great majority of our people in Ethiopia and neighbouring countries.

The Oromo people endured a century of colonial subjugation under successive Abyssinian regimes that not only forbade the public use of Afan Oromoo, the Oromo language, but also designated its rich oral literature, condemned its magnificent culture to oblivion, and above all tried to deny the very existence of this great nation of more than 25 million. The current regime in Ethiopia, under a veil of mock democracy, continues to perpetrate the oppression and exploitation of the Oromo in a more systematic way.

As you may see from the enclosed brochure, the aim of the Voice of Oromo Liberation is to reach the millions of Oromos living in rural areas cut off from the rest of the world by a curtain of poverty, illiteracy and above all colonial oppression.

We are the conviction that freedom is the birth right of every human being. Access to information and its dissemination are also part of human rights. We hope that you, as a hobby radio monitor, share our convictions and help us in our endeavor to open up the minimum of modern communication to the millions in rural Oromia.

Thank you once again for your interest and the information you provided us with.

Teye Teferra,  
Secretary, SBO Committee Europe.

The Voice of Oromo Liberation - Sagalee Bilisummaa Oromoo.

## Micro 'casting

Bud Stacey; PO Box 907, Satsuma, AL 36572

Contributions toward the goal of increasing & spreading knowledge about Part 15 microbroadcasting are greatly appreciated; this is YOUR column! Please send all QSLs, station information, broadcast schedules and what-have-you to the address above...

The RAMSEY FM-25: Finally, a synthesized, easily-programmable FM transmitter kit! This transmitter was mentioned in a previous ACE but until this time, I had very little technical information about it. In between consulting for a local technical college and donations of info from others, here are some findings! The first is from a fellow micro'caster and WOLF Radio Network affiliate, "The Dude": "Hey, Bud! I've finally got a handle on my Ramsey FM-25 PLL FM stereo transmitter, and here's how....It took me a full night to build and after I powered up I had a major problem with frequency stability [imagine that! bud] - the PLL was deviating as much as + or - 3 MHz... yuck! I had a hairline crack in a PC run and it took me about three weeks to find it."

"After that, I set the FM-25 to 104.1 MHz, but the closest I could get was 104.093 MHz. By changing capacitor C1 from a 47pf fixed cap to a 20-50pf trimmer cap, I was able to tune to 104.1 MHz. BUT, I noticed drift [expected! bud]... in an hour, the FM-25 would drift as much as 11 kHz below 104.1 MHz. What helped was to ditch the AC/DC adapter that came with the kit in lieu of a well-regulated 13.8 VDC power supply. Now it only drifted down 6 kHz below 104.1 MHz; that's not bad, but I wanted better! I suspected temperature warm-up and I was right, so now I'm running the FM-25 with the cover off. It now drifts as much as 500 Hz! For now, I'm leaving it that way; the power and temp tricks work with the FM-10 & FM-10A as well.... To get a better handle on temperature, I might try replacing capacitors C2, C10 and C12 with silver mica capacitors." [true! more later. bud]

"The FM-25 is a very spurious transmitter. On amateur radio frequencies, I've noticed that it layed out "spurs" on 6, 2, and 1.25 meters and 70 cm, as well as most of the FM broadcast band and aviation band... yikes!!! To reduce that problem, I replaced coupling capacitor C27 from a .001uf cap to a .130 uh variable inductor. That helped a lot for 2m, 1.25m, 70cm and the aviation band, but I still get spurs on 6m and the FM band. Any ideas?"

"I have done an audio modification to improve the audio and volume of the FM-25; I will not get into that; however, since my studio set-up may be different from everyone else's. My system is set up to be compatible with three different Part 15 transmitters from both Ramsey and Panaxis. If anyone has more ideas on improving the Ramsey FM-25, please feel free to write to: The WOLF Radio Network, WNY Affiliation, PO Box 452, Wellsville, NY 14895 [please enclose three stamps!], or write to Bud at this column." ["Another WOLF affiliate who's trying an FM-25 is Dick Tator of Omega Radio; he reports he's doing well with his transmitter."]

"In other news, WOLF Radio affiliate, the Naked DJ of Black Swan Radio appears to have found a high-powered FM pirate [gasp! bud] in his town on 87.9 MHz. This station is mono, has great audio quality, covers about 6km and is mysterious - no i.d. was heard. The station just plays whole thrash metal albums and is on for hours at a time. Nice catch! Until next time, 73! The Dude."

Thanks, amigo, well done! By the way, The Dude runs three outlets now, "Ultimate Rock 91.5FM", "All Jam Radio 104.1FM", and an AM Carrier Current station on 600 kHz, "AM 600". In addition to The Dude's upgrades, here are a few that should be tried: change capacitors C30, C32, C18, C12 and C20 to silver mica caps; change C22 and C14 to polystyrene caps; change C2 to a silver mica, or at the very least, an NPO; and C7 & C8 to AT LEAST NPO's.

In looking at a schematic a friend sent me, and reading the new Ramsey catalog, I saw where R19 [2.2k ohms] could be strapped for more power [Ramsey states it in the catalog!]. One could just replace R19 with a variable/trimmer resistor for two areas; one, to tune the transmitter, and two, to tune it for the maximum power for that village/missionary station outside the U.S.!

OK, Yo tells me I've taken up enough space for now; until next time, happy radioing & 73! de Bud.

**ASSOCIATION OF CLANDESTINE RADIO ENTHUSIASTS**  
**P. O. Box 11201, Shawnee Mission, KS 66207-0201**

The A\*C\*E is an association of individuals who find pirate, clandestine and covert communications an interesting part of their radio listening hobby. The primary existence of the club revolves around the publication of a monthly bulletin. The A\*C\*E. The bulletin reports on pirate, clandestine, covert and other unexplained broadcasts. Also, the readers are provided with other available material concerning motives, explanations and theories behind these various broadcasts and broadcasters. The ACE as an organization, does not encourage, support or condone any illegal activity; we simply seek to understand the nature and reasoning behind such broadcasts. If your interests include listening to pirate radio stations, clandestine broadcasts and covert communications, The A\*C\*E is for you!!

All subscriptions, renewals, and queries regarding subscriptions should be sent to the above club address. Contributions for each editor should be sent to their own given addresses.
